

Download Instructions

Hypercom Optimum T4100

To perform a compliance update:

Please adjust tips if applicable and settle any open batch in the terminal to avoid deleting transactions.

If you are unsuccessful with your download, or have questions about these instructions, please contact us by calling 1-888.804.4222, and selecting the terminal help desk options.

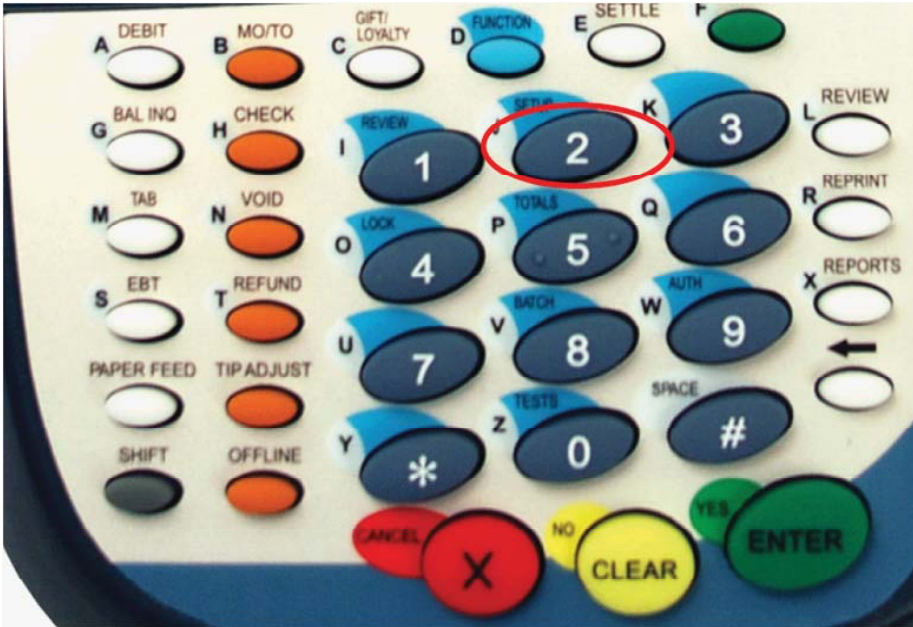

1. From the idle screen, press the green “Home” key:

2. Press the blue “Function” key:

3. Press “2” to select “App Maintenance.”

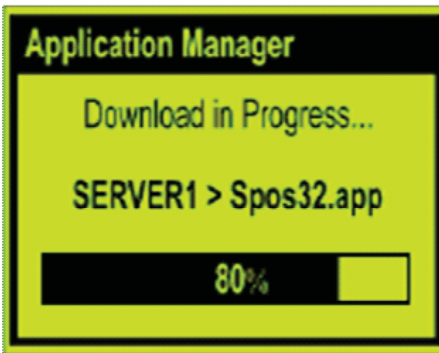

4. Press “1” to select “Update Applications.”

5. Terminal will display “This action may delete transactions, settle now. Press Cancel to exit.” Since we settled already, go ahead and press the green “Enter” key.

The terminal will display “Dialing,” “Modem Training,” “Processing,” and once connected will display a download progress screen:

6. After the download completes, the T4100 will reboot and stop at the main menu. Press the white hot key on the side of the display beside of “SPOS32” to launch the application.
